

ADURA TECHNOLOGIES WINS SAN FRANCISCO BUSINESS TIMES AWARD

Adura Technologies has been selected as a finalist for the San Francisco Business Times Green Business Award.

The newspaper's panel of editors and judges selected 25 finalists in 13 award categories from a pool of nearly 200 nominees. Finalists will be honored and the category winners named at an awards reception June 9 at the Hilton San Francisco.

In Adura's notification of the award, the Business Times said the reception would be "a celebration honoring the leaders and entrepreneurs in green business, building and products – as well as energy efficiency, transportation and the best and brightest innovators and champions of green and sustainable business practices."

Each of the finalists will be profiled in a special publication which will appear in the June 11 edition of the San Francisco Business Times.
